

## 14.C Network Latency

A terminal window titled 'rohit@rohit-VB1: ~' with a menu bar (File, Edit, View, Search, Terminal, Help). The user runs './network-test.sh network-test-machine-list.txt' and 'cat network-test-latency.txt'. The output shows latency values for various websites: www.google.com (639.119), www.flipkart.com (706.515), www.youtube.com (863.292), www.godaddy.com (1108.468), www.facebook.com (564.370), and www.yahoo.com (863.027).

```
rohit@rohit-VB1: ~  
File Edit View Search Terminal Help  
rohit@rohit-VB1:~$ ./network-test.sh network-test-machine-list.txt  
rohit@rohit-VB1:~$ cat network-test-latency.txt  
www.google.com 639.119  
www.flipkart.com 706.515  
www.youtube.com 863.292  
www.godaddy.com 1108.468  
www.facebook.com 564.370  
www.yahoo.com 863.027  
rohit@rohit-VB1:~$
```

Steps:

- There are two files required to run this script
  1. Network-test-machine-list which includes list of DNS's
  2. Network-test-latency.txt in which all the outputs will be printed.
